Replacement Valuation

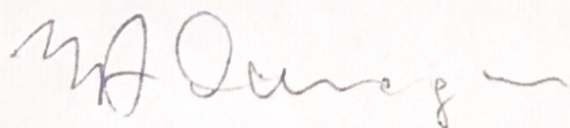

Unique Functional Art Console Table.

As this piece is unique it would be impossible to replace it exactly as it is.

However, to create a table of this quality and similar materials would entail the making of the top in copper that has been textured by compressed air. The copper is then polished back and Acid is used to create a Tiffany Green patina using just the Artist's eye and experience.

When the patina is cured in this case it gives the impression of Snakeskin. The top is then sealed to prevent tarnishing. The serpent style steel legs are then added and the table is signed and dated by the Artist .

I would put a replacement valuation of £12,500 to £15,000 + VAT

1/7/19.
